

Upgrade Your Quality of Care with Obie

EyeClick is a world leader in interactive technology, and the creator of Obie, an award-winning gaming and activity solution that turns any physical space into an immersive and highly entertaining experience.

Improve Your Residents Well Being

Empowers Moving

An excellent way to improve mobility with active games for people in long term care.

Cognitive Activity

Encourages turn-taking, helps reconnect with family and friends and creates safe social experiences.

Social Interactions

Combines cerebral stimulation and entertainment through our interactive games.

"Residents are **responding with love and are delighted** with Obie's activities. They are interacting at a level that is usually not easy for them to attain."

- *Lisa McAllen*
Healthcare Nurse

One Obie. Four Modes. Countless Possibilities.

Obie is a highly advanced interactive gaming console that projects custom-made games onto any surfaces - tabletops, floors, and walls - encouraging active play through touching, moving, and hand-eye coordination skills on the displayed images.

The **Perfect** Innovative, Seamless and Safe Solution

1

Simple and Hassle-Free

We take care of everything for you. One of our skilled technicians will install Obie directly on-site.

2

Safe and Germ-Free

Obie provides safe, hygienic, and germ-free gaming experiences and activities.

3

Seamless and Easy Control

Built using the newest and most innovative technology and equipped with an easy-to-use control keyboard.

4

Fits Into Any Space

Obie can project games onto any tabletop, floor, and wall to create meaningful joy inside your center.

Meaningful **Play** for Seniors

Seniors engaged in high quality, active play-based experiences will feel better about their physical capabilities and improve their willingness to communicate.

MEDICAL RESEARCH SHOWS

Senior citizens present with special needs, and as their share of the population grows, so does the magnitude of challenge in addressing these needs.

It has been shown that **targeted cognitive exercises** can actually change the underlying neural substrates. This strengthens the rationale for using specially designed games for **cognitive enhancement both in healthy aging** and in a wide range of clinical disorders.

Therapies for seniors must integrate cognitive, physical, and social stimulation. Obie accomplishes such integration like no other
